Details

1.	TMS I.D.	TMS-2025-1178
2.	Originator	Internal Source
3.	Date	Dec 12 2025 5:00 PM
4.	Theatre	HUMINT
5.	Current Priority	For Action
6.	Subject	AI/ML Study Group - Edge Computing Research Paper and IIT Collaboration
7.	Input	A reliable internal source reports that the AI/ML Study Group is preparing to submit a joint research paper with IIT Bangalore on 'Edge Computing for Real-Time Traffic Intelligence in Indian Smart Cities'. This paper is the culmination of multiple connected initiatives: the federated learning research presented at the IEEE Conference (ref: TMS-2025-0312), knowledge gained from the LLM Study Sessions (ref: TMS-2025-0612), and practical insights from the Bengaluru Traffic Analysis project (ref: TMS-2025-0867). Kiran Reddy and Prakash Hegde are lead authors with co-authors from IIT Bangalore's Computer Science Department. The paper will be submitted to the ACM Computing Surveys journal in January 2026. Lavanya Subramaniam contributed the NLP analysis section. Venkatesh Rao provided the benchmarking results. This paper is part of the broader Tech Innovation Lab - IIT Bangalore research partnership (ref: TMS-2025-1102) being formalized by Amit Sharma and Srinivas Reddy. Manpreet Singh is preparing a presentation based on the paper for an upcoming AI conference in Singapore in March 2026. Sneha Krishnamurthy is working on a companion paper focused on multilingual NLP for Indian traffic data.
8.	Grading	B2
9.	Has Attachment	Yes - Paper draft (confidential)
10.	Input Closed
