

Restart:

1. Set GPU layers and start ollama

```
export OLLAMA_GPU_LAYERS=999
```

```
sudo systemctl start ollama
```

2. Warm up embedding model

```
ollama run mxbai-embed-large "hello"
```

3. Warm up LLM

```
ollama run gemma3:12b "hello"
```

4. Verify GPU usage

```
ollama ps
```

5. Clear ChromaDB

```
rm -rf /opt/isd/ISDDocumentIntelligence_V5/backend/chroma_db_v5
```

6. Clear SMAC progress DB

```
rm /opt/isd/ISDDocumentIntelligence_V5/dbscripts/.smac_bulk_progress.db
```

7. Clear MySQL smac_reports table

```
mysql -u root -p (password: isdadmin)
```

```
DELETE FROM ISDIntelligence.smac_reports;
```

```
EXIT;
```

8. Activate venv

```
source /opt/isd/venv/bin/activate
```

9. Start backend (keep this terminal open)

```
cd /opt/isd/ISDDocumentIntelligence_V5/backend
```

```
uvicorn app:app --host 0.0.0.0 --port 8001
```

10. Open a new terminal, activate venv again

```
source /opt/isd/venv/bin/activate
```

11. Run SMAC bulk indexer

```
cd /opt/isd/ISDDocumentIntelligence_V5/dbscripts
```

```
python bulk_index_smac.py --folder "/data/SMAC Data" --case-id 0 --username rajibds --  
password rajibds --workers 5
```
